Compliance Statement General Product Safety Regulation (GPSR)

Essity Hygiene and Health AB, confirms that our products placed on the European market comply with the General Product Safety Regulation (EU) 2023/988. At Essity, product safety and full compliance with all applicable laws and regulations is a top priority.

The GPSR applies to non-food products and to all sales channels. It provides a safety net for products or risks not regulated in other EU legislation. The GPSR provides for new, more future-proof product safety rules reflecting the new reality of EU consumers, by among others tackling the safety of online sales, direct imports, or new technology products.

Products like medical devices, cosmetics, electronic equipment, biocides and food contact materials are regulated by other harmonized regulations. The GPSR still applies to these products where specific safety requirements are not specified in the union regulations.

For these products we follow the applicable standards and regulations as per

- Cosmetic product regulation 1223/2009, e.g. Soaps
- Radio Equipment Directive 2014/53/EU, EMC Directive 2014/30/EU, e.g. Electronics dispensers
- Biocides product regulation 528/2012, e.g. Hand sanitizers
- Detergent and surfactant regulation 648/2004 e.g. Surface cleaning wipes
- CLP Classification, labelling and packaging of substances and mixtures 1272/2008, e.g. Air freshener
- Regulation on materials and articles intended to come into contact with food No 1935/2004 e.g. kitchen towels and napkins

For easy access to us as manufacturer we have the digital address (web-address) with reference to local homepage, telephone, and physical address, printed on the package together with the local sales address, connected to a contact form.

As part of EU we are part of the Safety Gate rapid alert system, EU rapid alert system for dangerous non-food products, enabling us to quickly exchange safety information on potential hazards. Products which pose a risk to health and safety can be easily identified and actions (e.g., recall) can be taken.
