## FDA Compliance of Panduit Metal Detectable Nylon (-86) and Metal Detectable Polypropylene (-186)

Panduit Corp. manufactures wire management products made of metal detectable nylon and metal detectable polypropylene material. These products are intended for use in the proximity of food processing, handling, and packaging operations. In addition, these products are used for managing wiring on food processing and packaging equipment, and inside electrical control panels found in food processing and packaging operations.

Panduit Corp. declares that the materials that comprise Panduit metal detectable nylon and metal detectable polypropylene comply with the following sections of US FDA regulation 21 CFR and may be used in indirect food contact applications per:

- Section 184 – Direct Food Substances Affirmed as Generally Recognized as Safe (GRAS)
- 177.1500 – Nylon Resins
- 177.1520 – Indirect Food Additives – Olefin Polymers
- 178.3297 – Indirect Food Additives – Colorants for Polymers
- 170.39 – Threshold of Regulation for Substances Used in Food-Contact Articles

This statement applies to articles supplied by Panduit Corp. and without any further modification. Since conditions of use are outside of Panduit Corp.'s control, Panduit Corp. makes no warranties, express or implied, and assumes no liability in connection with any use of this information.

For an understanding of the U.S. FDA 21 CFR regulations, please go to the FDA's website at:  
<http://www.cfsan.fda.gov>

We appreciate your interest and use of Panduit metal detectable products.

Sincerely,

Terry Larson  
Business Development Manager, Wiring Components
