

# EXTREME WEATHER WATERPROOF SAFETY BOOTS

STYLE 8140i

NOKNOK **style 8140i safety boots** are heavy-duty waterproof premium work footwear that keeps feet fresh and dry even in the most damp conditions. Equipped with **Aqua-Cell® membrane** ensure this boot is **100% waterproof** and **breathable** at the same time.

They are manufactured with extra strong linings and provide an extra wide fit. PU nose enhancement and **full leather upper** makes this style highly durable. **Style 8140i safety boots** are 100% metal-free, equipped with **Protech Fiber toe cap** and **Tech-Fiber anti-penetration layer**. Because it is non-metal there is no heat or cold transfer, keeping your toes at a comfortable temperature.

Outsole injected with soft and flexible PU significantly improves comfort of wearing **style 8140i safety boots** and absorbs shocks and energy while walking.

Great value for money and the ideal footwear for airports, construction, hard work areas and extreme weather conditions requiring really durable and waterproof footwear. This style passes metal detectors without any problems.
